

# International Conference for Young Scientists on Biorefinery Technologies and Products

April 27-29, 2022 Riga, Latvia

# BTechPro! 2022

Students and other young researchers are welcome to participate in the **International Conference for Young Scientists on Biorefinery Technologies and Products BTechPro 2022**, which will be held in Riga (Latvia) on **April 27-29, 2022**.

The conference is organised by the **Latvian State Institute of Wood Chemistry**, which is **one of the leading biomass research centres in the Baltic region**. To promote the **professional development** of young scientists in the field of biomass processing and to establish a **valuable network** of aspiring researchers, the institute will host the BTechPro 2022 conference, which will not only be a platform for the participants to

- **present their scientific work, give and get feedback from peers,**
  - **listen to interesting plenary lectures,**
  - **submit a full-length article,**
- but also a possibility to
- **actively take part in workshops and match-making activities.**

The **call for abstracts** will be open **from September 6 to November 22**. Participants are welcome to submit their presentation titles, concerning all aspects of **biomass processing and characterisation**. The participants will be encouraged to submit a full-length manuscript for publication in a special issue of the conference.

For **more information** about the up-coming event and the Latvian State Institute of Wood Chemistry, please, visit the institute's home page <http://kki.lv/en/research-activity/conferences> or feel free to contact us by e-mail [btechpro@kki.lv](mailto:btechpro@kki.lv)
